

About

I'm not a bike mechanic, but I am a tinker. I learned to wrench by volunteering at a local shop fixing bikes to be donated to kids in need. So, although I've got no certifications, I do know how to true wheels, rebuild drive drains, adjust derailleurs and replace cables. And I love it. Nothing makes me happier than rebuilding some old, abandoned bike I find, and I'm proud to say that all my bikes make absolutely no noise when I'm riding. I just think a bike is simultaneously one of the simplest and most complicated machines. They're fun to work on, and building a collection of bike mechanic tools is addictive.

Over the years, I've kept a journal for each of my bikes. It's nice having all the specs at my fingertips when I'm making repairs and really helpful knowing how many miles it's been since my last new chain. As a software developer, I wanted to learn how to develop a WordPress plugin, so the idea of making my bikes journals a plugin just seemed natural. I took an online class on WordPress development and got as far as creating a plugin that could be installed, activated and removed and created a widget that allowed an interactive display of a collection of bikes and their specs and maintenance records. I started created the admin pages, but it was slow going as I was learning and constantly refactoring.

Enter AI. When it came on the scene, I knew I needed to learn how development could be improved using ai and the pitfalls of using it. I reattacked my plugin with a plan to use AI to finish the admin screens, add some new features and improve my existing code.

The result is BikePress. If you are like me (obsessed with riding, building , maintaining and collecting bikes), maybe you'll enjoy using this plugin for tinkers. I'd love to know what you think or hear how you're using it.

Data and Privacy

My data and privacy policy is simple. I do not collect any data from you. I would love to hear from you about your experience with BikePress, but I won't add you to a distro list, solicit you or give your information to anyone for any reason ever. Simple enough.

Terms and Conditions for BikePress

1. Acceptance of Terms

By downloading, installing, or using **BikePress** ("the Plugin"), you agree to these Terms and Conditions. The Plugin is developed by **Steve Weeks/Off the Kitchen LLC** ("the Developer"). If you do not agree to these terms, do not install or use the Plugin.

2. License and Distribution

The Plugin is open-source software and is licensed under the **GNU General Public License (GPL) v2 or later**. You are free to modify, redistribute, and reuse the source code in accordance with the terms of the GPL.

3. Local Operation and Privacy

The Plugin operates entirely within your self-hosted WordPress installation.

- **No Tracking:** It does not collect, log, or transmit any user data, site analytics, or system telemetry.
- **No External Calls:** It does not connect to any external servers, third-party APIs, or cloud infrastructure to function. [\[1\]](#)

4. No Warranty ("As Is")

The Plugin is provided "as is" and "as available," without any warranty of any kind, express or implied. The Developer does not guarantee that the Plugin will be error-free, uninterrupted, or fully compatible with every WordPress theme, hosting environment, or other active plugins.

5. Limitation of Liability

In no event shall the Developer be liable for any direct, indirect, incidental, or consequential damages. This includes, but is not limited to:

- **Website downtime**, crashes, or server errors.
- **Data loss**, database corruption, or security vulnerabilities.
- Financial loss or damage resulting from the use or inability to use the Plugin.

6. Support

Technical support is not guaranteed. Any assistance provided through the official WordPress.org support forums is offered voluntarily, on a best-effort basis, without any service level agreements.

7. Governing Law

These terms are governed by the laws of **the United States of America** without regard to its conflict of law principles.
